DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-4 and 6-14 have been considered but are moot in view of the new grounds of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-4 and 6-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention.

Claims 1, 6, 7, and 8 each recite a plurality of sensors on the surface of the solid-state imaging device, wherein each sensor is associated with a filter. These claims have been amended to recite, "each of the plurality of filters ... has a different transmission characteristic than others of the plurality of filters." In other words, the claim now recites that each filter has a unique transmission characteristic. This claim language does not comport with the specification.

Page 18 of the specification, for example, discloses a filter S580 that passes light near the 580 nm range. Sensors using this type of filter are “dispersed uniformly over the surface of the solid-state imaging device 11.” The same page also discloses that a plurality of sensors using another filter — termed “SLR” — is located on the image sensor.

Claims 2-4 and 9-14 are rejected because they are dependent upon one of the claims rejected *supra*.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 9-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention.

Claims 9-11 each recite the limitation “said plurality kinds of filters” on lines 1-2. There is insufficient antecedent basis for this limitation in the claim, as this term, as written, is not used elsewhere in the claims. Additionally, it is not entirely clear whether the recited filters refer to “a plurality of types of color filters” (see lines 3-4 in claim 1, for example) or “a plurality of filters” (see lines 8-9 in claim 1, for example).

Conclusion

6. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
